SUMMARY

Computer Engineering Student and **Frontend Developer (React)** with a solid CS foundation and **400+ CodeForces problems** solved. Currently actively contributing to the **Open Source** ecosystem to master complex, **large-scale codebases** and solve real-world technical challenges, while strategically expanding my expertise toward becoming a **MERN-Stack** engineer.

EDUCATION

B.S. in Computer Engineering, Mansoura University Oct. 2022 – May 2027
Relevant Coursework: DSA, OS, Database, OOP. (Score: 94%)

Self-Study: Frontend Development (FreeCodeCamp, MDN, udemy)
Learning Journey Repository — Building practical projects and mastering React.

Open Source Contributor Jan. 2026 – Present

PROJECTS

Personal Portfolio | *React.js, CSS, Redux* 2026

- Developed a fully responsive personal portfolio using React.js and Tailwind CSS, optimizing UI/UX for seamless cross-device experiences.
- Implemented dynamic skill filtering and interactive scroll-triggered animations with AOS library to enhance user engagement and content discoverability.
- Integrated serverless contact form functionality using EmailJS and deployed via Vercel, enabling direct client communication without backend infrastructure.
- Explore: [GitHub](#) | [Live Site](#)

Payment Application | *C, Data Structures* 2023

- Designed and implemented secure payment transaction logic in C, incorporating multi-layer data validation across card, terminal, and server interfaces.
- Developed efficient data structures to manage transaction states and ensure data integrity throughout the payment processing lifecycle.
- Applied systematic logic design principles to handle edge cases, error recovery, and secure data flow in resource-constrained environments.
- View source: [GitHub Link](#)

TRAINING & CERTIFICATIONS

Advanced Web Development | *React, JavaScript (Jonas Schmedtmann Courses)* 2025 – 2026

- Mastered **React.js** (Hooks, Context API, Redux) and **Modern JavaScript** through intensive project-based learning, focusing on scalable SPA architecture.

ICPC Competitive Programming | *Algorithms & Data Structures* Levels 0 & 1

- Completed intensive training on advanced **Problem Solving**, covering Graph Theory, Dynamic Programming, and time complexity analysis to optimize computational logic.

Technical Diplomas (ITI & NTI) | *Full-Stack & Frontend Foundations* 180 Hours Total

- Completed 180+ hours of professional training in **Database Design** (SQL Server), **OOP (C#)**, and **Modern Frontend** (HTML5, CSS3, JS), building multiple responsive web applications.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Rust, SQL, HTML/CSS

Frontend: React, Tailwind CSS, Bootstrap, Figma

Technical Proficiencies: Large-scale Code Tracing, Debugging, Technical Documentation, Version Control

Developer Tools: Git, GitHub, VS Code, SSMS
